

Amendments to the Specification

Page 8, the third full paragraph, lines 17 to 26, replace the paragraph with:

A plurality of reagent containers 20 are disposed on a disc 21 in a circular shape. The entire management computer 11 has a register unit for registering particular reagents-in-advance. The disc 21 is rotated by a motor. A plurality of reaction containers 22 are disposed on a constant temperature bath 23 in a circular shape. The constant temperature 23 is rotated by a motor. In accordance with the rotation of the constant temperature bath 23, each of the reaction containers 22 is moved from a position 24 to a sample dispensing position 25, a reagent dispensing position 26 and a reaction solution suction position 27.
